Symptoms of a SharePoint Meltdown

- “Exception message: Server out of memory. Please contact your administrator with this problem”
- “No results matching your search were found”
- “Form Validation Error”
- “Your search encountered an error. If the problem persists, contact the portal site administrator”
- “Edit Document requires a Windows SharePoint Services-compatible application”
- “Cannot complete this action”
- “Cannot connect to configuration database”
- “Unexpected Error occurred”

Stop the Meltdown with GamePLAN

ShareSquared’s **GamePLAN for SharePoint** is an intense 2 to 5 day workshop that provides a detailed assessment of your organization’s SharePoint implementation, along with a concrete plan to address problematic areas.

Over the course of the workshop, we will work with you to identify the root cause of your pains with SharePoint and outline a solution roadmap for addressing these issues. Workshops include a comprehensive review of the inner workings of SharePoint and education aimed at how to get and keep SharePoint under control through proper configuration, governance and administrative practices.

The **GamePLAN** workshop is customized to meet your company’s particular issues with SharePoint. The length and breadth of the workshop is flexible and can accommodate small installations to large, enterprise deployments.

Upon conclusion of the **GamePLAN** workshop, you will receive detailed session notes, recommendations, and concrete tasks for addressing the major issues with your SharePoint deployment. By leveraging strategies and best practices for SharePoint implementation, your organization will gain control over SharePoint and be positioned to utilize SharePoint as a reliable, business-critical platform.
