**Your one-stop answer for SharePoint
and Business Intelligence!**

Business Intelligence GamePLAN Overview

The SharePoint product comprises many facets including Content & Document Management, Search, Collaboration, Workflow and last, but certainly not least, **Business Intelligence!**

Implemented correctly, SharePoint is a powerful foundation for building scalable, flexible, self-service Business Intelligence solutions. Leveraging these BI capabilities requires a firm understanding of the platform and well-designed plan of execution.

ShareSquared’s **Business Intelligence GamePLAN** workshop is an intense 2 to 5 day workshop that provides a detailed assessment of your business needs and a plan to address those needs using SharePoint, Excel/PowerPivot, Data Services/Feeds, SSIS, SSRS and other related technologies.

Brainstorming sessions are used to form a vision and plan for enterprise business intelligence. Workshops include education and a technology deep-dive aimed at your specific business challenges and opportunities. Over the course of the workshop, we will work with you to map out your requirements and discover data sources and processes that can be exposed, integrated, improved and streamlined through the use of Microsoft® Business Intelligence technologies.

The **Business Intelligence GamePLAN** workshop is customized to meet your company’s particular needs. The length and breadth of the workshop is flexible and can accommodate organizations new to SharePoint and Business Intelligence concepts, as well as, more advanced audiences.

Upon conclusion of the **Business Intelligence GamePLAN** workshop, you will receive detailed session notes, strategies and best practices for deployment, as well as, a solution roadmap that positions your organization to leverage SharePoint, SQL Server and Excel/PowerPivot as an enterprise-wide, self service, business intelligence platform.
