PLANing for SharePoint

The SharePoint Server product comprises many facets including:

- Enterprise Content Management & Search
- Electronic Forms
- Collaboration & Workflow
- Document & Records Management
- Business Intelligence

Implemented correctly, SharePoint is a powerful platform for Intranet and Extranet Portals, as well as, for building scalable, extensible, best-in-class business applications. To leverage the unparalleled capabilities of SharePoint, a firm understanding of the platform and well-designed plan of execution is required.

ShareSquared's **GamePLAN for SharePoint** is an intense 2 to 5 day workshop that provides a detailed assessment of your business needs and a plan to address those needs using SharePoint 2007 or 2010.

Over the course of the workshop, we will work with you to map out your business requirements and discover processes that could be improved and streamlined. Brainstorming sessions are used to form a vision and plan for SharePoint implementation. Workshops include a comprehensive SharePoint overview and education aimed at your specific business challenges and opportunities.

The **GamePLAN** workshop is customized to meet your company's particular needs. The length and breadth of the workshop is flexible and can accommodate organizations new to SharePoint as well as advanced SharePoint users.

Upon conclusion of the **GamePLAN** workshop, you will receive detailed session notes, strategies and best practices for SharePoint 2007 & 2010 deployment, as well as, a solution roadmap that positions your organization to leverage SharePoint as a true business critical platform.
